

Full-stack developer combining **React/JS and Python proficiency with UX and project management experience**. Thrives in fast-paced, agile teams, bringing a **background in creative advertising** that sharpens both **creative problem-solving** and **communication with technical and non-technical stakeholders**. Competent with **GitHub Copilot** and **Claude Code**, pairing them with **TDD** and **solid engineering fundamentals** to ship **well-designed, robustly tested, and scalable code**. Strong growth mindset with an investment in elevating team code quality through peer review and collaboration.

## Experience

### Schrodinger Inc. – Developer I

May 2025 - present

- Accelerating drug discovery workflows by developing graphical molecular dynamics analysis tools using **Python, PyQt, and an MVC framework**. Applying **test-driven development** and **object-oriented principles** to build scalable features with rigorous unit testing.
- **Scaling org-wide AI adoption** as member of the **Agentic DevX working group**. **Authoring educational newsletters on responsible use of AI** and **facilitating cross-department workshops** on integrating agents into the software development lifecycle.
- Operating in an **Agile** environment — **drafting Jira tickets, architecting code**, and organizing work into deliverable tasks to ensure on-time feature releases.
- **Collaborating with UX designers, product managers, scientific stakeholders, and QA teams**; applying UX principles to bridge communication between teams and align on complex requirements.

### ClinicMind Inc. – UX Designer (Intern, Contractor)

Oct 2024 - May 2025

- **Designed a unified patient intake system** across mobile, web, and kiosk platforms using **Figma and Adobe Illustrator**. Simplified navigation and expanded selection options to increase user adoption and accessibility.
- **Rearchitected the design system to achieve 1:1 parity with the Material Icon API**, enabling developers to map assets directly to code via standardized naming.
- **Maintained and extended the design system**, establishing new standards for modals and features. **Created detailed UX specs and interactive prototypes** to streamline design-to-development handoff.
- **Accelerated product discovery** by **facilitating stakeholder workshops** to define requirements and **partnering with engineering leads** to validate technical feasibility prior to high-fidelity handoff.

### Naviguide Inc. – Software Engineer, UI

Jul 2024 - Nov 2024

- Led the **UX/UI design and implementation** of a consumer website using **React and Tailwind CSS** to secure VC interest and strategic partnerships (Pursuit, Boys & Girls Club). Created detailed **Figma prototypes and UX specifications** for multiple user-facing dashboards.
- **Engineered a multi-step student onboarding flow** using **PHP Laravel**, including user authentication, backend data connection, and authorization enforcing parental consent for student users.

- Managed project tasks via Jira, maintained continuous team alignment, and collaborated with engineering lead to validate and optimize technical decisions throughout development.

## Live Music Project – Fullstack Software Engineer (Volunteer)

Mar 2024 - Jul 2024

- **Refactored and maintained a legacy codebase** (Django, Django REST Framework, React), improving stability, performance, and maintainability, while **integrating third-party features** like reCAPTCHA validation.

## Rithm Student Information System – Software Engineer Intern

Jan 2024 - Feb 2024

- Implemented a **RDBMS-based tagging system to improve search functionality** in a Django and PostgreSQL based platform. Streamlined testing using third party libraries for model generation, and achieved **99% unit test coverage** of new features.

## Japan Exchange and Teaching Program – Assistant Language Teacher

2021 - 2023

- Rapidly designed and **taught K-12 lesson plans across six Japanese public schools**.
- **Self-taught N3 Japanese to operate in a 100% Japanese workplace**. Served as **Area Leader and US Cultural Ambassador**, mentoring peers on cultural adjustment while organizing community activities.

## Black Math Inc. – Art Director

2016 - 2020

- **Spearheaded concept-to-delivery of branding campaigns** in multiple domains (online, web/TV animation, live action/events, VFX, installation). Clients include **America's Test Kitchen, Meta, Instagram, Kellogg's, National Geographic, Reebok, Boston Museum of Fine Arts, and Starbucks**.
- Ensured consistent delivery of design assets under tight deadlines and evolving requirements. Pitched creative concepts, managed staff/freelance talent, and collaborated with animation/production teams.

## Technical Skills

- **Languages & Libraries:** Python, Javascript, Typescript, SQL, PHP, HTML, CSS, jQuery
- **Frameworks & Tools:** React, Django, Flask, Express, Node.js, Next.js, PyQt, Bootstrap, Tailwind, Sass, Laravel, PostgreSQL, SQLAlchemy, AWS S3, Jest, Jasmine, unittest, REST APIs, Git, GitHub, TDD, Webpack, Vite, Babel, npm, Insomnia, Jinja
- **DevOps & Cloud:** AWS S3, Docker, Git, GitHub, CI/CD pipelines, Agile/Scrum (Jira, GitLab)
- **Agentic Coding:** GitHub Copilot, Claude Code
- **Other:** Figma, Adobe Photoshop, Illustrator, Indesign, After Effects

## Education

- **Full Stack Web Development** - Rithm School
- **Bachelor's in Fine Arts, cum laude** - Rhode Island School of Design
